IMPACT

A Learning Journey for Community

Our Story

In 1983, two inspired public school educators identified a clear need not being met by the public education system.

- We need innovative hands-on learning experiences that go beyond the classroom.
- We need these experiences to be guided by career professionals who can mentor students.

Gail Whitney and Jackie Jackson founded Saturday Academy forty-two years ago! While the programs have evolved, the mission remains deeply relevant.

Mission

Saturday Academy develops creative, confident, and curious critical thinkers by engaging students in socially conscious and equitable Science, Technology, Engineering, Arts, and Math experiences. We spark curiosity, connect our community, and empower students to become the innovative thinkers and problem solvers of the next generation.

Vision

Saturday Academy believes in the transformative power of hands-on learning in Science, Technology, Engineering, Arts, and Math (STEAM). We seek to enrich the world with wide access to these opportunities for diverse students in K-12 grade across the state of Oregon.

Values

- Growth Mindset Focused on Progress
- Producing Quality Programming that Centers the Student Experience
- Science, Technology, Engineering, Arts, and Mathematics
- Staff as our Greatest Asset
- Equity, Diversity, and Inclusion (EDI)
- Sustainability and Respect for the Future of the Planet

WHAT WE DO

Summer Programs

- Our summer programming provides full-day, full-week camps for rising K-8 grade students from 9am - 4pm. Each camp explores different areas of STEAM through hands-on, project based learning in a fun and accessible way.

Days Off Workshops

- This dynamic full-day workshop series introduces K-5 and 9-12 grade students to a wide range of skills, knowledge, industries, and real-world fun on scheduled school outage days when caretakers still have to work.

Link.ed School Residencies

- Our Link.ed School Residency Program is designed to introduce and deepen students' understanding and confidence in a wide range of STEAM subjects through after-school programming.

Apprenticeships in STEAM Exploration

- Our Apprenticeships in STEAM Exploration (ASE) program connects motivated high school students with mentors in science, technology, engineering, the arts and math (STEAM) pre-professional internships. The driving value behind the ASE program is that the interns should contribute to and learn from the mentor's work.

Saturday Academy partners with corporations and area businesses to ensure access to immersive hands-on learning experiences for all students K-12 grade in Oregon and SW Washington.

We curate transformative experiences through student-centered learning opportunities that explore the intersections of Science, Technology, Engineering, Arts, and Mathematics (STEAM), designed to remove barriers of access to necessary transformation.

We believe that through these explorations students will cultivate a deeper sense of their identity, community connection, and global awareness fostering informed innovators for the next generation.

YOUR ROLE IN COMMUNITY IMPACT

How is your organization supporting the community?

Sponsorship aligns your company's brand, values, and actions with Saturday Academy's reputation for high-quality dynamic education.

DATA ON WHO WE SERVE

Nationally Recognized

Since 1996, Saturday Academy has been recognized as a leader in Science, Engineering, and Mathematics Mentoring Programs, as designated by Bill Clinton. This award is given for embodying excellence in mentorship of underrepresented students and encouraging achievement in Science, Engineering, and Mathematics.

Justice, Equity, Diversity, Inclusion, and Access

We are committed to restorative justice practices as we provide programming to historically and systematically excluded communities.

Sponsor ASE

Apprenticeships in STEAM Exploration

Help us make a lasting impact by sponsoring the Apprenticeships in STEAM Exploration program — connecting high school students to career-connected learning experiences.

\$1,000

Sponsor the Symposium and Mid-Summer Conference | 2026, Mid-July & Mid-August — two celebratory events that highlight learning and shared expertise from the eight week Apprenticeship. These gatherings bring together more than 145 interns, mentors, and families to showcase their findings.

\$1,500

Sponsor a student's learning experience and ensure students have the capacity to participate.

\$2,000 - \$4,000

Sponsor an Internship Host Site that is currently unfunded. This directly supports a host organization that takes on the mentorship responsibility for a part-time to full-time internship, helping ensure a diverse group of internship hosts.

Benefits

CORPORATE VOLUNTEERISM

As a non-profit with a small, but mighty staff, we are deeply appreciative of organizations that make space for their employees to volunteer. Here is how you can get involved!

Volunteer Days

- Throughout the year, we have recurring opportunities where Saturday Academy tackles big projects. From LEGO sorting to programming supply prep, and much more, we have projects that need many hands! We can come to you or you can come to us, and we'll ensure your hours are well-spent moving our needle forward.

Supporting Events

- Several times a year, we are in need of a large number of volunteers to support the execution of Cultivation Events, Spring Soiree, Summer Conferences for ASE, Makers Market, and more!

Sustainability Push

- We are always in need of reliable support to help haul items to Metro for recycling or to the various tech donation sites we use.

Provide Your Insight

- Through our programming opportunities, we have a multitude of ways for you to help inspire the next generation of creative problem-solvers. Whether that is hosting a High School Days Off!, being a career panel speaker, running a workshop, or being a special educator during our camps. The perfect way to help the students that we serve directly.

Other Ways to Support

In-Kind Donations

- Do you have a fabulous vacation home, a special skill, tickets and/or an item that you'd like to offer to Saturday Academy to leverage at an event such as the Spring Soiree? We are all ears! These types of gifts can be extended to services and/or consulting support that we otherwise would have to pay for.

Employee Giving

- We would love to enroll Saturday Academy as an option for your employees to give and employer's to match!

Days Off at Portland State University, grades 9-12

ASE Intern with Mentor - NW Documentary
Andru M and Ritika A

14 Summer Camp - Cartography Creators, grades 6-8

Summer Camp - LEGO Robotics, grades 3-5
